## Questions to Cr O'Pray

Submitted 22 July 2016

### **SOLAR FARM PROJECT**

1. Can you please indicate where the \$39 million dollars will be raised from and or what type of loan will we be taking out?

### **FLOOD MANAGEMENT**

Could you please answer the question below, as there was not enough time for you to do so previously. Thank you.

1. Why is the flood management/data different for the airport to across the David Low Way and the turtle sands project?

### **HELICOPTER NOISE**

1. Fly Neighbourly Policy – Can you please provide this to us and let us know how to report it if the policy is not being adhered to. What are the penalties?

2. You mentioned that one of the commitments in relation to the helicopter activity while the new airport runway is under construction would be the relocation of the existing two helicopter training pads currently located in the north western sector of the aerodrome to the north west of the aerodrome – so we are moving from the north western sector to north west of the aerodrome, seems like no move at all. Can you elaborate further?

### **SHELL EXPRESS SERVICE STATION**

1. Can you please explain in your own words on what grounds this application has been accepted and the rezoning of this area accepted without any community consultation? Thank you.

### **PRATT SURFING WORLD**

1. Referring to the recent declaration of conflict of interest and your decision to leave the Council meeting where the decision on the above application has been made.

Why did you forget the conflict of interests you had by accepting campaign fundings from the applicant ahead of the thousands of local residents you were elected to represent? Please explain.

### **AIRPORT**

1. As a community we would like to see the business case for the development of the airport.

Can you please update us on the direction for funding of the new runway from the Special Meeting conducted on 13th June 2016.
